Ryzom - Bug # 1014

Status:	Rejected	**Priority:**	Low
Author:	aquiles	**Category:**	Tools: General
Created:	07/09/2010	**Assignee:**	vl
Updated:	07/09/2010	**Due date:**	
Subject:	Config file parsing error with large string		

Description

There seems to be a restriction in size for a configfile string value right now. If my string exceeds a certain length it crashes while parsing. Reproduced it with other configfiles and on Mac.

E.g. 1087 chars in Driver3D client.cfg crashes ryzom while 1086 not.

- Status changed from New to Rejected

- Assignee set to vl

- Target version set to Version 0.8.0

- % Done changed from 0 to 100

String in config file are limited to 1023 characters and it's enough for a normal use.

If you need string longer than that, you should think another solution to achieve it.
