Make that a 9.10 error plz

```
DISTRIB_ID=Ubuntu
DISTRIB_RELEASE=9.10
DISTRIB_CODENAME=karmic
DISTRIB_DESCRIPTION="Ubuntu 9.10"
```

Please what happens if you put :

```
CMAKE_MINIMUM_REQUIRED(VERSION 2.6)
```

instead of

```
CMAKE_MINIMUM_REQUIRED(VERSION 2.8)
```

I don't sure we are currently using CMake 2.8 features (NeL is using CMake 2.6).

#3 - 07/17/2010 11:32 pm - piotter

changed to CMAKE_MINIMUM_REQUIRED(VERSION 2.6)
in \$HOME/ryzon/code/ryzon/CmakeLists.txt

Build and making DEB without complaining

<http://dev.ryzom.com/wiki/ryzom/BuildForLinuxCmake>

Building Ryzom Client

sudo checkinstall -y -D --pkgname nel-client --pkgversion 7.9.1.2

maybe better to set it back to 2.6 if 2.8 is not needed

Was this build tested on Windows using CMake? I'm relatively certain I changed it to 2.8 due to the CPack packaging calls for NSIS. If it works with 2.6 then I'm fine.
