Subject:	New icon sizes and locations for client		

Description

Applications desktop menu is using a 48x48 icon in /usr/share/pixmaps but window icons should be located in /usr/share/icons/hicolor.

Each different size should installed in their specific directory (16x16, 22x22, 24x24, 32x32, 36x36, 48x48, 64x64, 72x72, 96x96, 128x128, 192x192, 256x256) or in "scalable" when it's a SVG file.

Not all sizes are used so we should check which ones are the most important.
