Ryzom - Feature # 1028

Status:	Closed	**Priority:**	High
Author:	kervala	**Category:**	OS: GNU/Linux
Created:	07/24/2010	**Assignee:**	kervala
Updated:	08/26/2010	**Due date:**	
Subject:	Implement GlWndProc for X11		

Description

There is a GlWndProc function for Windows and not for X11 events or Mac OS.

We should add one to be able to :

- listen window position changes
- listen window size changes
- optimize some parts where we are requesting window size even if size hasn't changed
- forward Qt or other externals events to OpenGL driver (don't need to transform externals events to native ones)
- simplify some existing parts
- implement copy/paste
- listen when user click on close button
- activate/deactivate window
- etc...
