

Ryzom - Bug # 1087

Status:	New	Priority:	Normal
Author:	Dread7	Category:	
Created:	08/31/2010	Assignee:	
Updated:	08/31/2010	Due date:	
Subject:	Cpack ignores install prefix when building RPMs		
Description	<p>The installation paths in code/nel/CMakeFiles.txt and code/nelns/CMakeFiles.txt are ignored when cpack creates RPM files on Fedora 12 and CentOS 5.5. Additionally cpack tries to create a log directory in an inappropriate place when building the nelns RPM file. Here are some fixes:</p> <pre>1diff -r 5bafd599a355 code/nel/CMakeLists.txt 2--- a/code/nel/CMakeLists.txt Sun Aug 22 09:57:33 2010 +0200 3+++ b/code/nel/CMakeLists.txt Tue Aug 31 12:37:06 2010 -0400 4@@@ -158,6 +158,8 @@ 5 ENDIF(WITH_TESTS) 6 7 IF(UNIX) 8+ SET(CPACK_SET_DESTDIR "ON") 9+ SET(CPACK_INSTALL_PREFIX "\${CMAKE_INSTALL_PREFIX}") 10 SET(prefix \${CMAKE_INSTALL_PREFIX}) 11 SET(exec_prefix \${CMAKE_INSTALL_PREFIX}/bin) 12 SET(libdir "\${CMAKE_INSTALL_PREFIX}/lib") 13 14diff -r 5bafd599a355 code/nelns/CMakeLists.txt 15--- a/code/nelns/CMakeLists.txt Sun Aug 22 09:57:33 2010 +0200 16+++ b/code/nelns/CMakeLists.txt Tue Aug 31 12:32:09 2010 -0400 17@@@ -105,7 +105,9 @@ 18 SET(PKGDIR "\${NL_SHARE_PREFIX}/nelns") 19 SET(LOGDIR "\${NL_LOG_PREFIX}/nelns") 20 ADD_DEFINITIONS(-DNELNS_CONFIG="\\"\${ETCDIR}\\" -DNELNS_STATE="\\"\${PKGDIR}\\" -DNELNS_LOGS="\\"\${LOGDIR}\\"") 21-INSTALL(CODE "FILE(MAKE_DIRECTORY \${LOGDIR})") 22+SET(CPACK_SET_DESTDIR "ON") 23+SET(CPACK_INSTALL_PREFIX "\${CMAKE_INSTALL_PREFIX}") 24+INSTALL(CODE "FILE(MAKE_DIRECTORY \\${ENV{DESTDIR}}\${LOGDIR})") 25 26 IF(BUILD_SERVICES) 27 ADD_SUBDIRECTORY(admin_executor_service)</pre>

Thanks a lot for reporting the bug and providing a patch :)

Edit: I fixed the presentation :)
