

## Ryzom - Bug # 1125

<b>Status:</b>	New	<b>Priority:</b>	Normal
<b>Author:</b>	mixxit	<b>Category:</b>	Client: General
<b>Created:</b>	10/09/2010	<b>Assignee:</b>	
<b>Updated:</b>	10/09/2010	<b>Due date:</b>	
<b>Subject:</b>	client_ryzom_r.exe StartupHost		
<b>Description</b>			
<p>'If you are using client_ryzom_r.exe provided in the client archive, it connects to Openshard ignoring what you set for StartupHost. It's probably why you don't see users in your database, because you create them in Openshard database.'</p> <p>This is confusing for a new user. Especially if the open ryzom shard is up.</p> <p>Any chance this can be fixed in the client download for first timers?</p>
