## Ryzom - Feature # 1237

Status: **Priority:** Normal New Author: aquiles Category: Client: General Created: Assignee: 01/19/2011 **Updated:** 01/19/2011 Due date:

Subject: Be able to recreate and successfully use sheet\_id.bin with only existing ryzom core data

## Description

At the moment we are still using an old existing sheets\_id.bin file, overloaded with old ryzom data, to append our own sheets. It will be easier to maintain and use, if we are able to completely generate it by ourselves. In addition by doing this we'll find out some missing steps or bugs in the whole content creation process which were hidden by using existing data and id files.
