Updated:	09/30/2010	Due date:	
Subject:	bytesToHumanReadable returns " 1234(null)"		
Description	Function "NLMISC::bytesToHumanReadable (uint64 bytes)" is returning an incorrect string. Instead of "1234MB" it's returning "1234(null)".		

History

"%u" is not a correct formatting syntax for uint64 so the units string hadn't the correct offset.

I added TB for Terabyte since it's becoming more and more common.

The function with a string parameter is now using the modified one.
