Subject:	Fix the build for the general_utilities_service (GUS)		
Description			
<p>The General Utilities Service (GUS) is an event and contest administration tool with some other handy shard management utilities built in. It is missing one header file from game_share and needs its CMakeLists.txt fixed so that it builds correctly. It may need updating of some of the C++ syntax as the last known build of this was on VS6.</p>
