Ryzom - Bug # 1525

Status:	Resolved	Priority:	Normal
Author:	Bagatto	Category:	Build
Created:	02/18/2013	Assignee:	
Updated:	04/25/2013	Due date:	
Subject:	Unable to build on Ubuntu 12.04 using cmake		

Description

I've been always able to build ryzom client using cmake, just until the hg pull update of 14th february.
Since then, i had problem, during the build it doesnt find the libwww include folder (it looks for 'libwww' but it actually is w3c-libwww, solved this creating a symbolic link) and later it fails as in attachment.

Regards and thanks

History

#1 - 02/18/2013 06:00 pm - Bagatto

Forgot to say that my Ubuntu is 64 bit.

#2 - 02/19/2013 06:05 pm - Bagatto

Ok with the last update it's back building and working, thanks and sorry ;)
This can be close.

#3 - 04/25/2013 01:08 pm - kervala

- Category set to Build

- Status changed from New to Resolved

- Target version set to Version 0.9.0

- % Done changed from 0 to 100
