

Ryzom - Bug # 1526

Status:	New	Priority:	Normal
Author:	koanhead	Category:	
Created:	03/06/2013	Assignee:	
Updated:	03/06/2013	Due date:	
Subject:	client crash under mission		
Description			
<p>In Aeden Aqueous, if the Lake Roots mission (the last one for the Fairhaven greeter) is active, NeL goes crazy when the toon is in the Root Prospection Zone. Graphics become choppy, ping rises to unrealistic values (>9000 is common, >40000 not unheard-of), ryzom-client shows using 108% or more in top. After time between a few seconds and about a minute, NeL segfaults.</p> <p>Walking the toon out of the prospecting area stops the problem. Abandoning the mission and walking into the area does not trigger the problem.</p>
