Ryzom - Bug # 538

Status:	Closed	**Priority:**	Normal
Author:	sfb	**Category:**	Build
Created:	05/11/2009	**Assignee:**	sfb
Updated:	09/30/2010	**Due date:**	
Subject:	End of Line style is incorrect in SVN.		
Description			

The eol-style for SVN should be set to "native" for all text/source files. This will prevent future CR->CRLF corruptions when multiple platforms and/or editors are involved in working on the source.

The command to accomplish this is:

svn propset eol-sytle native filename.txt

History

#1 - 05/20/2009 03:54 pm - sfb

Here is an example script that may accomplish this. We probably want additional file extensions in there such as:

- htm
- html
- txt
- cfg
- php

```
#! /bin/sh
for i in `find . -name '*.cpp' \
    -or -name '*.c' -or -name '*.h'`
do
    unix2dos $i
    svn propset svn:eol-style native $i
done
```

#2 - 05/28/2009 02:40 pm - sfb

- Status changed from New to Resolved

- % Done changed from 0 to 100

Applied in changeset r1563.

#3 - 05/28/2009 02:42 pm - sfb

- Status changed from Resolved to Closed

- Estimated time set to 1.50

Using a variation of the script I posted (I added some more file extensions) I updated the property and filtered the files to fix any lingerly CR->CRLF issues.

#4 - 09/29/2010 09:41 pm - kervala

- Project changed from NeL to Ryzom

- Category changed from Build to Build

- Target version deleted (Version 0.7.0)

#5 - 09/30/2010 02:41 pm - kervala

- Target version set to Version 0.7.0
