<b>Subject:</b>	Snowballs config in home dir		
<b>Description</b>			
Patch copy config template from /etc/ into user's home dir.			

History

#1 - 09/08/2009 03:04 pm - lubos

- File *home-dir.diff* added

#2 - 09/08/2009 04:32 pm - sfb

- Target version set to 0.8.0

Since this patch adversely affects functionality on Windows I'll be moving this to 0.8.0.

Thanks lubos!

#3 - 09/08/2009 04:50 pm - kerval

I think these functions could be added in NeL (perhaps in NLMISC::CPath) instead of Snowballs :)

#4 - 09/08/2009 06:20 pm - sfb

kerval,

I agree. I have some magic I use in Werewolf for XP/Vista systems as well that I'd like to include.

#5 - 09/29/2010 09:44 pm - kerval

- Project changed from NeL to Ryzom
- Category deleted (Snowballs client)
- Target version deleted (0.8.0)
