

Ryzom - Bug # 859

Status:	Closed	Priority:	Low
Author:	Letto	Category:	Client: General
Created:	05/09/2010	Assignee:	kervala
Updated:	05/28/2010	Due date:	
Subject:	surpress the annoying "Using TR1 extensions" message		
Description			
Patch to surpress the annoying message			
This message adds 3 lines to any compile output wich screws up cmake's nicely formated reporting. cmake produces nicely colored one-line output wich makes it easy to spot any warning. this message screws that.

when i try to see the revision and click on the diff, I get
The entry or revision was not found in the repository.
Is this normal?

#4 - 05/09/2010 12:41 pm - kervala

Yes because files are hosted on SourceForge and it seems like Redmine can't show differences between remote files, so you should look at :
