<b>Subject:</b>	Ryzom Client - Screenshot of unspecified type requested.		
<b>Description</b>			
<p>Hi.</p> <p>Just another trivial patch.</p> <p>A recent change to eliminate compiler warnings introduces some code which prints a warning every frame: "Screenshot of unspecified type requested."</p> <p>The attached patch removes this warning (since it is not true, there was no screenshot requested) while still removing the compiler warning about un-handled case in switch.</p>
