Could you elaborate please ?

If you choose 1600x1200 and quit the game, it won't remember it after relaunching it ?

Please note that login and character selection windows are fixed in 1024x768.

#### #2 - 03/18/2011 03:16 pm - prozacr

Yes, I choose x and quit the game, it won't remember it after relaunching it.

What Ryzom client are you using ?

This tracker is related to Ryzom Core and not Ryzom client.

#### #4 - 03/18/2011 03:39 pm - prozacr

Oh I using Ryzom client. Ryzom core is fixed?

#### #5 - 03/18/2011 04:15 pm - kervalala

Normally yes :)

Ryzom official client (under Windows at least) is not using Ryzom Core sources at all (for the moment).
