

Ryzom - Bug # 1384

Status:	New	Priority:	Normal
Author:	Potlatch	Category:	
Created:	10/25/2011	Assignee:	
Updated:	10/26/2011	Due date:	
Subject:	Crash right after using a TP (source)		
Description	<p>Using official client from kervalas PPA on Ubuntu 10.4, ryzom-core-0.8.1847~lucid1, the client crashed right after using a TP (to source, tryker, the kara one).</p> <p>BT attached</p>		

History

Thanks again for the report :)

It seems to crash in CSimpleSource::play() but I have no idea why :(

I will have to try to teleport several times until it crashes :p

#2 - 10/26/2011 04:29 pm - Potlatch

I use this TP on a daily basis and it's the first time a crash occurs there.

It was also a bit special: there was an OP battle at this moment (the OP is ~600m away from the TP), and probably some people around. My guess is a very rare conjunction of factors triggers this bug.

#3 - 10/26/2011 04:41 pm - kaetemi

Perhaps too many sounds building up sound playback backlog, and during tp there maybe was a samplebank swap, and a sound was scheduled to play from the previous samplebank?
