

Ryzom - Bug # 1432

Status:	Assigned	Priority:	Urgent
Author:	Botanic	Category:	Tools: Build Gamedata
Created:	02/24/2012	Assignee:	kaetemi
Updated:	04/12/2012	Due date:	
Subject:	Pipeline client_patch bugs		
Description	<p>The pipeline client_patch does a few things wrong</p> <ol style="list-style-type: none">1) does not generate ryzom_open.version2) the generated xml includes <pre><_Category> <_Name type="STRING" value="main_cfg"/> <_UnpackTo type="STRING" value="./cfg"/> <_IsOptional type="SINT32" value="0"/> <_IsIncremental type="SINT32" value="0"/> <_Files type="STRING" value="cfg.bnp"/> </_Category> <_Category> <_Name type="STRING" value="main_exedll"/> <_UnpackTo type="SINT32" value="."/ /> <_IsOptional type="SINT32" value="0"/> <_IsIncremental type="SINT32" value="0"/> <_Files type="STRING" value="exedll.bnp"/> </_Category> <_Category> <_Name type="STRING" value="main_fonts"/> <_UnpackTo type="STRING" value="./data/fonts"/> <_IsOptional type="SINT32" value="0"/> <_IsIncremental type="SINT32" value="0"/> <_Files type="STRING" value="fonts.bnp"/> </_Category> <_Category> <_Name type="STRING" value="main_packed"/> <_UnpackTo type="STRING" value="./data"/> <_IsOptional type="SINT32" value="0"/> <_IsIncremental type="SINT32" value="0"/> <_Files type="STRING" value="packedsheets.bnp"/> </_Category> <_Category> <_Name type="STRING" value="user"/> <_UnpackTo type="STRING" value="./user"/> <_IsOptional type="SINT32" value="0"/> <_IsIncremental type="SINT32" value="0"/> <_Files type="STRING" value="user.bnp"/> </_Category> <_Category> <_Name type="STRING" value="examples"/></pre>		

```
<_UnpackTo type="STRING" value="./examples/" />
<_IsOptional type="SINT32" value="0" />
<_IsIncremental type="SINT32" value="0" />
<_Files type="STRING" value="examples.bnp" />
</_Category>
```

however that causes the patch to not work

History

#1 - 02/24/2012 10:27 pm - Botanic

Change

```
_IsIncremental type="SINT32" value="0" />
```

to

```
_IsIncremental type="SINT32" value="1" />
```

and it works :D

however it cant patch its own exe so thats a problem...

#2 - 02/25/2012 09:08 am - kaetemi

It's not supposed to be `_IsIncremental`.

The pipeline should copy the `.refs` to the client install.

And the exe patch is caused by some issue that causes the generated `.bat` to move the `exedll` contents to `./0` instead of `./`

#3 - 02/25/2012 09:39 am - Botanic

i think that it puts them in `/0` because it cant write the `exe/dll`'s it works for other files just not ones that are write protected

#4 - 03/02/2012 10:18 pm - kaetemi

- Status changed from *New* to *Validated*

The generated xml needs to be different anyways.

#5 - 04/12/2012 08:04 pm - kaetemi

- Status changed from *Validated* to *Assigned*

- Priority changed from *Normal* to *Urgent*

- Target version set to *Version 0.9.0*
