

Ryzom - Bug # 1484

Status:	New	Priority:	High
Author:	Botanic	Category:	
Created:	07/17/2012	Assignee:	
Updated:	07/17/2012	Due date:	
Subject:	Password in client must be 5-8 characters		
Description			
<p>From what I can tell there is no reason that the UI doesnt allow you to have a longer password then this, and frankly a 5-8 char password isn't very secure.</p> <p>The UI should allow at least 5-12 in my honest opinion.</p>			

History

#1 - 07/17/2012 11:31 am - Botanic

The login screen supports up to 20 chars, the create account ui is the only problem.

#2 - 07/17/2012 11:50 am - Botanic

- File 2143.patch added

Patch to fix, also email's can only be 254 chars not 255 so I fixed that as well, the create account ui now supports 20 chars for user and pass same as login screen.

#3 - 07/17/2012 12:34 pm - Botanic

- File 2144.patch added

username cant be longer then 12 so fine lets make it consistent at least!
