Updated:	12/06/2012	Due date:	
Subject:	Display corruption when two clients are running		
Description			
<p>Hello,</p> <p>I connected another account for a rez, and having two clients running (both fullscreen, on two desktops) lead to a display corruption. I join my detailed configuration. I also have a video, but the server reinitializes the connexion during the upload (13.9MB so not equivalent of the size limit of 107.4MB).</p>
