Subject: Not Work in CentOS6

Description

I try build ryzomcore (last version) in a dedicated server CentOS6 and not Work...
when i run client, make login, create character and try enter in newbie_land (ingame) crash the client because the server not work fine..
i test the last code in ubuntu and work, i test a old code (december10) in centos and work..
if i try last code in centos6 not work!
