

Ryzom - Bug # 192

Status:	Closed	Priority:	Normal
Author:	kervalala	Category:	Build
Created:	11/22/2008	Assignee:	kervalala
Updated:	09/30/2010	Due date:	
Subject:	CConfigFile is causing a RtlValidateHeap error		
Description			
<p>It crashes when it tries to free cf_CurrentFile in config_file.cpp line 437 when we are compiling nlmisc with a Debug DLL C++ Runtime on debug mode. cf_CurrentFile was previously allocated by a strdup().</p> <p>You can try the attached project which reproduces the crash. If you uncomment "COXml output;", it won't crash.</p> <p>I don't really understand why this is happening.</p>			

History

#1 - 11/23/2008 02:28 pm - kervalala

- Status changed from New to Closed

msvcrt.lib is conflicting with msvcr.lib when using libxml2 so we must ignore msvcr.lib in link settings

#2 - 05/11/2009 07:32 pm - kervalala

- % Done changed from 0 to 100

#3 - 09/29/2010 09:26 pm - kervalala

- Project changed from NeL to Ryzom

- Category deleted (Misc)

- Target version deleted (Version 0.7.0)

#4 - 09/30/2010 11:40 am - kervalala

- Category set to Build

- Assignee set to kervalala

- Target version set to Version 0.7.0
