Subject:	porting Tools MFC Cleaning : ZViewer		
Description			
<p>found the ZViewer Tool on my way: ZViewer allows you to view one or more zones exported from 3DSMax inside the NeL Engine</p> <p>MFC was only used to display the Window Icon. I removed it, so it should now be cross-platform, plus I think there is already a NeL mecanism to display Window Icon as the "init" method of the IDriver interface accepts an Icon as a parameter. So I guess the "initDriver" method of the CNELU should also accepts one, which is not the case, but i didn't feel like trying to modify NeL right now.</p> <p>I also completed the english translation of the readme file, fixed a bug at config file load (screen resolution wasn't taken into account), and fixed the vertical text alignment.</p>			

History

#1 - 12/06/2008 07:53 pm - kervala

- Target version set to Version 0.7.0

You didn't need to remove the .rc file, but only replace "afxext.h" by <windows.h>

This project is not using MFC excepted for this include which is not required.

I applied most of your changes and added :

- fix for absolute path in .bank files
- WinMain under Windows instead of main()
- a title for NeL window
- all errors which were printed in console are now written in log.log
- font from snowballs (is working too under Linux) instead of one from Windows

#2 - 12/06/2008 08:00 pm - kervala

- Status changed from New to Resolved

- % Done changed from 0 to 100

Applied in changeset r586.

#3 - 05/11/2009 07:56 pm - sfb

- Status changed from Resolved to Closed

This has been applied to SVN and we are able to build it using VCExpress 2008.

#4 - 09/29/2010 09:27 pm - kerval

- *Project changed from NeL to Ryzom*
- *Category deleted (Tools)*
- *Target version deleted (Version 0.7.0)*

#5 - 09/30/2010 11:43 am - kerval

- *Category set to Tools: General*
- *Assignee set to kerval*
- *Target version set to Version 0.7.0*
