

Ryzom - Bug # 324

Status:	Closed	Priority:	Low
Author:	kervalva	Category:	NeL: General
Created:	02/02/2009	Assignee:	kaetemi
Updated:	09/30/2010	Due date:	
Subject:	Add method to get a list of all supported sound formats/extensions (ogg, mp3, wav, etc...) for each sound driver		
Description			
Fmod supports a lot of formats (mp3, ogg, modules, etc...) but other sound drivers only support the minimum (wav) so we should add an extension to get a list of all of them.			

History

#1 - 02/10/2009 08:59 pm - kaetemi

- Status changed from New to Validated

FMod driver music is implemented trough FSOUND_Stream, and doesn't have an FMUSIC implementation, so modules aren't supported afaik.

The FMod driver currently has music support implemented for: container/audio files with .ogg, .mp3, .mp2, .wav, .raw extensions.

The XAudio2 driver currently has music support implemented for: container/audio files with .ogg extension (no .wav stream).

Other drivers don't have a music implementation. Music implementation will be moved up to high level nlsound trough buffer streaming implementation in lowlevel drivers (todo #99), with support for additional driver-specific implementation for extra formats in drivers.
