

Ryzom - Feature # 57

Status:	New	Priority:	Low
Author:	vl	Category:	
Created:	09/08/2008	Assignee:	
Updated:	09/29/2010	Due date:	
Subject:	create and manage bn7 files		
Description			
<p>bn7 will be compressed bnp with 7z. It'll be slow to read, but can be very useful in some case.</p> <p>Of course the behavior should be exactly the same as if it's a bnp (no directory structures, warn if 2 files have the same name...) and CIFile should read files in a transparent manner.</p>			

History

#1 - 09/08/2008 01:27 pm - vl

There's 2 solutions:

- directly read .7z files created with the 7z tools in a directory
- create a .bnp and then compress the bnp with the 7z tools
