

Ryzom - Bug # 777

Status:	Closed	Priority:	Normal
Author:	sfb	Category:	Build
Created:	12/07/2009	Assignee:	sfb
Updated:	11/05/2010	Due date:	
Subject:	CMake: CONFIGURE_FILE for 2.8 Installation Fails		
Description			
Developers using CMake 2.8 are encountering failures during 'make install' and 'make package' due to CONFIGURE_FILE generating the resulting file in a different destination than 2.6 and earlier which use CMAKE_BINARY_DIR. We need to determine where this new directory is and modify the INSTALL commands to reflect it appropriately based upon the version of CMake the user is using.			

History

#1 - 12/10/2009 05:42 pm - lubos

- File *cmake2.8-gen-file-path.patch* added

possible solution

#2 - 09/29/2010 09:47 pm - kervalala

- Project changed from *NeL* to *Ryzom*
- Category changed from *Build* to *Build*
- Target version deleted (*0.8.0*)

#3 - 10/16/2010 10:11 am - kervalala

- Status changed from *New* to *Resolved*
- Assignee set to *sfb*
- Target version set to *Version 0.8.0*

We fixed this by adding the output dir in CONFIGURE_FILE and in INSTALL so files are copied in the right location for all CMake versions :)

#4 - 10/16/2010 10:11 am - kervalala

- % Done changed from *0* to *100*

#5 - 11/05/2010 04:32 pm - kervalala

- Status changed from *Resolved* to *Closed*
