

Ryzom API - Bug # 822

Status:	New	Priority:	Normal
Author:	kregora	Category:	
Created:	04/13/2010	Assignee:	
Updated:	04/13/2010	Due date:	

Subject: Login to the Ryzom Web Applications is not encrypted

Description

Problematic URL: <http://atys.ryzom.com/start/index.php>

Since the intended use of the Ryzom API the relation between character and user account name is easily made. Because the Ryzom Webapplication, Ryzom Game Login, the Ryzom Forum and the Ryzom Account Management all share a common password all access routes should be protected by SSL.
