#3 - 05/18/2010 10:25 am - vl

- Target version set to Version 0.8.0

#4 - 05/18/2010 09:27 pm - kerozcak

- File configs.tgz added

- Assignee changed from kerozcak to vl

- % Done changed from 0 to 90

Ok, so that's my suggestion for the config files. They have been cleaned from unused variables. In a service config file there are only variables used by this service. common.cfg contains variables used by all services. There is also sql.cfg (included in service configs that use SQL), backup_service_interface.cfg and used_continents.cfg (included in some service configs that use common vars).

#5 - 05/20/2010 10:29 am - vl

It's applied!

cfg are lot of smaller and easier to manage. thank you for the patch

#6 - 05/28/2010 04:46 pm - vl

- Status changed from Assigned to Closed
