| <b>Subject:</b>  | ryzom/tools/scripts/linux/build should not force an architecture |                  |        |
| <b>Description</b>   |  |                  |        |
| The build script forces -march=pentium ... some compilers don't recognize that, and others see it as invalid (such as when targeting darwin). Please remove this option from the build script. |  |                  |        |
