

Ryzom - Feature # 942

Status:	Closed	Priority:	Normal
Author:	kerval	Category:	OS: GNU/Linux
Created:	05/26/2010	Assignee:	kerval
Updated:	01/08/2011	Due date:	
Subject:	Make all keys used for actions/macros identical on all platforms		
Description			
<p>Currently, Windows is using "virtual keys" and all keyboards keys have a name. Under Linux and Mac OS, each key has the name of its content but not its position in keyboard layout. While we need to use already defined key names in "nel/misc/events.h", we can't map most of these keys.</p> <p>We should map all identical key to the same key name under all platform (even if new keys can be created as needed).</p>

History

#1 - 05/26/2010 02:41 pm - kerval

- Status changed from Validated to Assigned
- Assignee set to kerval

#2 - 05/26/2010 02:52 pm - kerval

- File `keycodes.patch` added

I attached a patch which would work but keycodes are different under some platform (Mac OS X) so it needs some testing before applying it :)

#3 - 05/27/2010 10:09 am - kerval

- % Done changed from 0 to 90

Only a few keys are not yet defined, please post missing keycodes which are not in the switch block :) Thanks.

#4 - 05/27/2010 10:09 am - kerval

- File `deleted (keycodes.patch)`

#5 - 05/28/2010 01:22 am - rti

Did you test the current version already on a Mac?

For me, several number keys are not mapped correctly. Eg. 1 maps to 7, 2 to nothing, 3 to 8.

If you did not test it on another Mac machine, I could adjust it to match my system :)

#6 - 05/28/2010 09:11 am - kerval

Yes please could you adjust to your keycodes ? (I still can't launch xev on my Mac OS X :s)

Thanks a lot :)

#7 - 05/28/2010 11:09 am - rti

Sure. Will have a look into that.
