

Ryzom - Bug # 950

Status:	Rejected	Priority:	Low
Author:	rti	Category:	Build
Created:	05/30/2010	Assignee:	rti
Updated:	11/23/2010	Due date:	
Subject:	NeL Xcode project using CMake		
Description			
<p>Currently, a NeL Xcode project generated by CMake 2.8.1 fails to open with a parse error.</p> <p>The reason is this line:</p> <pre># Works around warnings about escaped quotes in ADD_DEFINITIONS # statements cmake_policy(SET CMP0005 OLD)</pre> <p>Changing it to NEW (or even removing it completely) fixes the issue. No warnings from CMake, the project can be opened and NeL builds without any errors.</p> <p>Is there any reason to keep it to OLD?</p>			

History

#1 - 11/23/2010 01:12 pm - rti

- Status changed from New to Rejected

- Assignee set to rti

works now :)
