## **Introduction**

## **OS-9 Technical Overview**

### **System Overview**

System Modularity .....	1-1
I/O Overview .....	1-4
Memory Modules.....	1-7
Basic Module Structure .....	1-8
The CRC Value.....	1-8
ROMed Memory Modules.....	1-9
Module Header Definitions .....	1-9
Additional Header Fields for Individual Modules.....	1-13

### **The Kernel**

Responsibilities of the Kernel.....	2-1
System Call Overview .....	2-2
User-state and System-state .....	2-2
Installing System-state Routines.....	2-3
Kernel System Call Processing.....	2-4
System Function Calls .....	2-4
I/O Calls .....	2-5

Memory Management .....	2-6
OS-9 Memory Map .....	2-7
System Memory Allocation .....	2-8
Operating System Object Code.....	2-8
System Global Memory .....	2-8
System Dynamic Memory .....	2-8
Free Memory Pool .....	2-9
Memory Fragmentation .....	2-10
Colored Memory .....	2-11
Colored Memory Definition List .....	2-11
Colored Memory in Homogeneous Memory Systems .....	2-14
System Performance .....	2-14
Re-configuring Memory Areas.....	2-14
System Initialization .....	2-15
Init: the Configuration Module .....	2-15
Sysgo .....	2-21
Customization Modules .....	2-22
Process Creation .....	2-23
Process Memory Areas .....	2-25
Process States.....	2-25
Process Scheduling .....	2-27
Pre-emptive Task-switching .....	2-27
Exception and Interrupt Processing .....	2-29
Reset Vectors: vectors 0,1 .....	2-31
Error Exceptions: vectors 2-8, 10-24, 48-63.....	2-31
The Trace Exception: vector 9.....	2-31
AutoVectored Interrupts: vectors 25-31, 57-63 (68070 only).....	2-32
User Traps: vectors 32-47 .....	2-32
Vectored Interrupts: vectors 64-255 .....	2-32

### **OS-9 Input/Output System**

The OS-9 Unified Input/Output System .....	3-1
The Kernel and I/O .....	3-3
Device Descriptor Modules .....	3-4
Path Descriptors .....	3-7
File Managers .....	3-9
File Manager Organization .....	3-10
File Manager I/O Responsibilities .....	3-11
Device Driver Modules.....	3-14

Basic Functional Requirements of Drivers ..... 3-14  
Driver Module Format ..... 3-15  
Interrupts and DMA ..... 3-16

**Interprocess Communications**

Signals .....	4-2
Alarms .....	4-4
User-state Alarms .....	4-4
Cyclic Alarms .....	4-4
Time of Day Alarms .....	4-5
Relative Time Alarms .....	4-5
System-state Alarms .....	4-6
Events .....	4-8
The Wait and Signal Operations .....	4-9
The F\$Event System Call .....	4-10
Pipes .....	4-11
Named and Unnamed Pipes .....	4-11
Operations on Pipes .....	4-12
Creating Pipes .....	4-12
Opening Pipes .....	4-12
Read/ReadLn .....	4-13
Write/WriteLn .....	4-13
Close .....	4-14
Getstat/Setstat .....	4-14
Pipe Directories .....	4-15
Data Modules .....	4-16
Creating Data Modules .....	4-16
The Link Count .....	4-16
Saving to Disk .....	4-17

**User Trap Handlers**

Trap Handlers .....	5-1
Installing and Executing Trap Handlers .....	5-3
OS9 and tcall: Equivalent Assembly Language Syntax .....	5-3
Calling a Trap Handler (Two Examples) .....	5-4
An Example Trap Handler .....	5-6
Trace of Example Two using the Example Trap Handler .....	5-9

**The Math Module**

Standard Function Library Module .....	6-1
Calling Standard Function Module Routines .....	6-3
Data Formats .....	6-4
The Math Module .....	6-4
Math Functions .....	6-5

## **OS-9 File System**

Disk File Organization .....	7-1
Basic Disk Organization .....	7-1
Identification Sector .....	7-2
Allocation Map .....	7-3
Root Directory .....	7-3
Basic File Structure .....	7-3
Segment Allocation .....	7-4
Directory File Format .....	7-5
Raw Physical I/O on RBF Devices .....	7-6
Record Locking .....	7-7
Record Locking and Unlocking .....	7-7
Non-sharable Files .....	7-8
End of File Lock .....	7-8
Deadlock Detection .....	7-9
Record Locking Details for I/O Functions .....	7-10
File Security .....	7-11
<b>Appendix A:</b> Example Code .....	A-1
Init Module .....	A-1
Sysgo Module .....	A-6
Signals: Example Program .....	A-8
Alarms: Example Program .....	A-10
Events: Example Program .....	A-12
C Trap Handler .....	A-14
RBF Device Descriptor .....	A-20
SCF Device Descriptor .....	A-25
SBF Device Descriptor .....	A-27
<b>Appendix B:</b> Path Descriptors and Device Descriptors .....	B-1
RBF Device Descriptor Modules .....	B-1
RBF Definitions of the Path Descriptor .....	B-10
SCF Device Descriptor Modules .....	B-13
SCF Definitions of the Path Descriptor .....	B-18
SBF Device Descriptor Modules .....	B-20
SBF Definitions of the Path Descriptor .....	B-23
Pipeman Definitions of the Path Descriptor .....	B-24
<b>Error Codes</b> .....	Error Codes -1

<b>System Call Indexes (by name and function)</b>	

# Introduction

## Manual Organization

The **OS-9<sup>®</sup> Technical Manual** is organized into two main sections: The **OS-9 Technical Overview** and the **OS-9 System Calls**.

The **OS-9 Technical Overview** contains the following chapters and appendixes:

- **Chapter 1 - System Overview**  
Provides a general overview of OS-9's four levels of modularity, I/O processing, memory modules, and program modules.
- **Chapter 2 - The Kernel**  
Outlines the responsibilities of the kernel. Explains user and system state processing, memory management, system initialization, process creation and scheduling, and exception and interrupt processing.
- **Chapter 3 - OS-9 Input/Output System**  
Explains the software components of the OS-9 I/O system and the relationships between those components.
- **Chapter 4 - Interprocess Communications**  
Describes the five forms of interprocess communication supported by OS-9: signals, alarms, events, pipes, and data modules.

- **Chapter 5 - User Trap Handlers**  
Explains how to install and execute trap handlers, and provides an example of trap handler coding.
- **Chapter 6 - The Math Module**  
Discusses math module functions, and lists descriptions of the assembler calls you can use with the math module.
- **Chapter 7 - RBF File System**  
Explains OS-9's disk file organization, raw physical I/O on RBF devices, record locking, and file security.
- **Appendix A - Example Code**  
Contains example code that you can use as a guide when creating your own modules. Provides examples of RBF, SCF, and SBF device descriptors.
- **Appendix B - Path Descriptors and Device Descriptors**  
Includes the device descriptor initialization table definitions and path descriptor option tables for RBF, SCF, SBF, and PIPEMAN type devices.
- **Error Codes**  
Provides descriptions of OS-9 error codes.

The **OS-9 System Calls** section contains descriptions for the following types of system calls:

- **Chapter 1 - User-State System Calls**
- **Chapter 2 - I/O System Calls**
- **Chapter 3 - System-State System Calls**

The **OS-9 Technical Manual** is designed for you to use in conjunction with the **OS-9 Technical I/O Manual**.
